UserHome

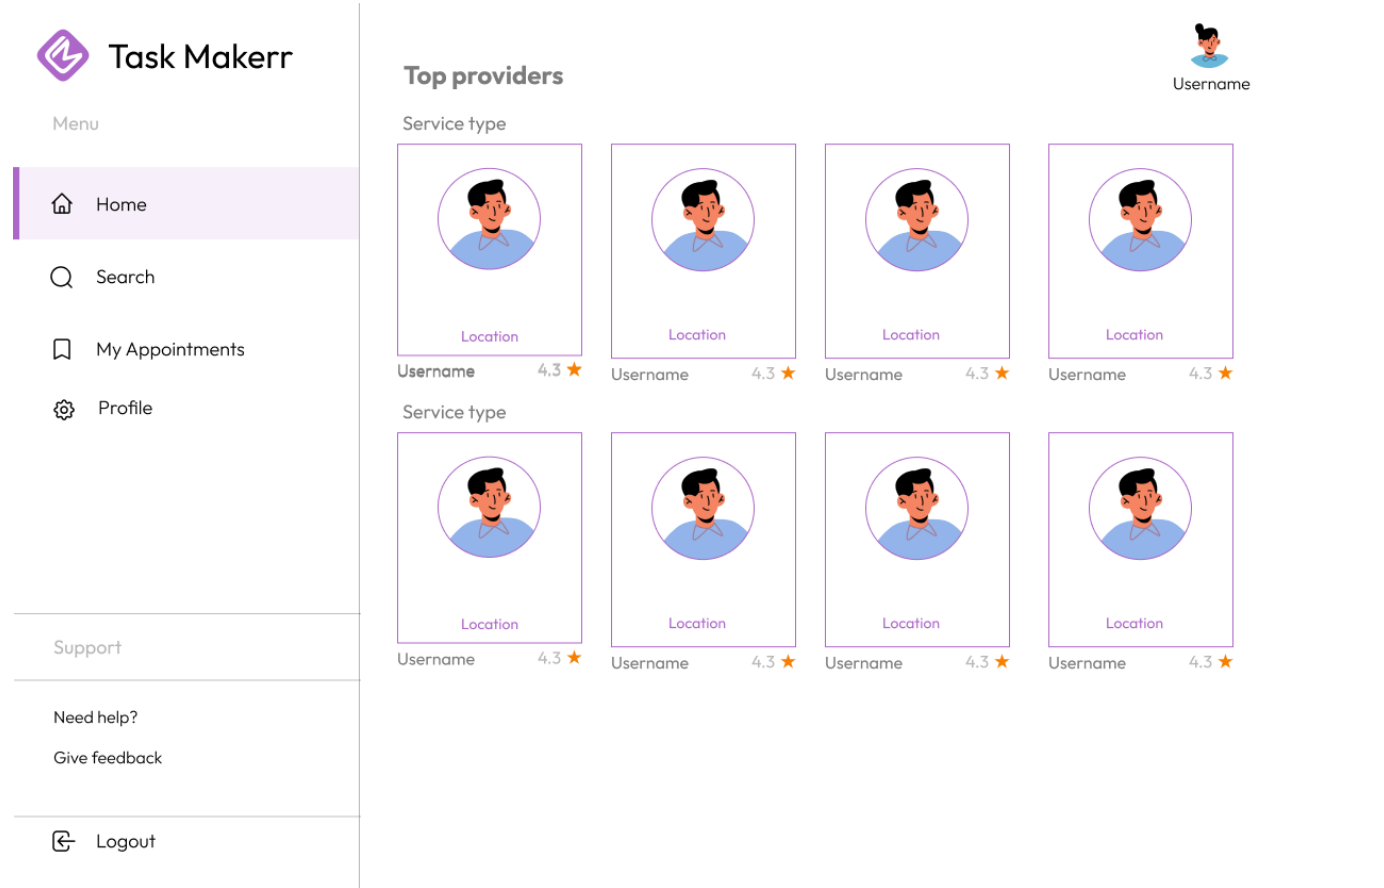

It is the home page which comes on logging in as User. It shows all providers according to service type. Providers in each service type are sorted by rating. Clicking on a provider tile navigates to the page to book slots. There is also a view all option for each service type which navigates to a page which shows all providers of a given service type.

Access Scope

Any customer who has an account can access this page.

Usage Instructions

- Click on the provider tile to navigate to the page to book slots.
- Click on the view all option to navigate to the page which shows all providers of a given service type.

ViewAllUser

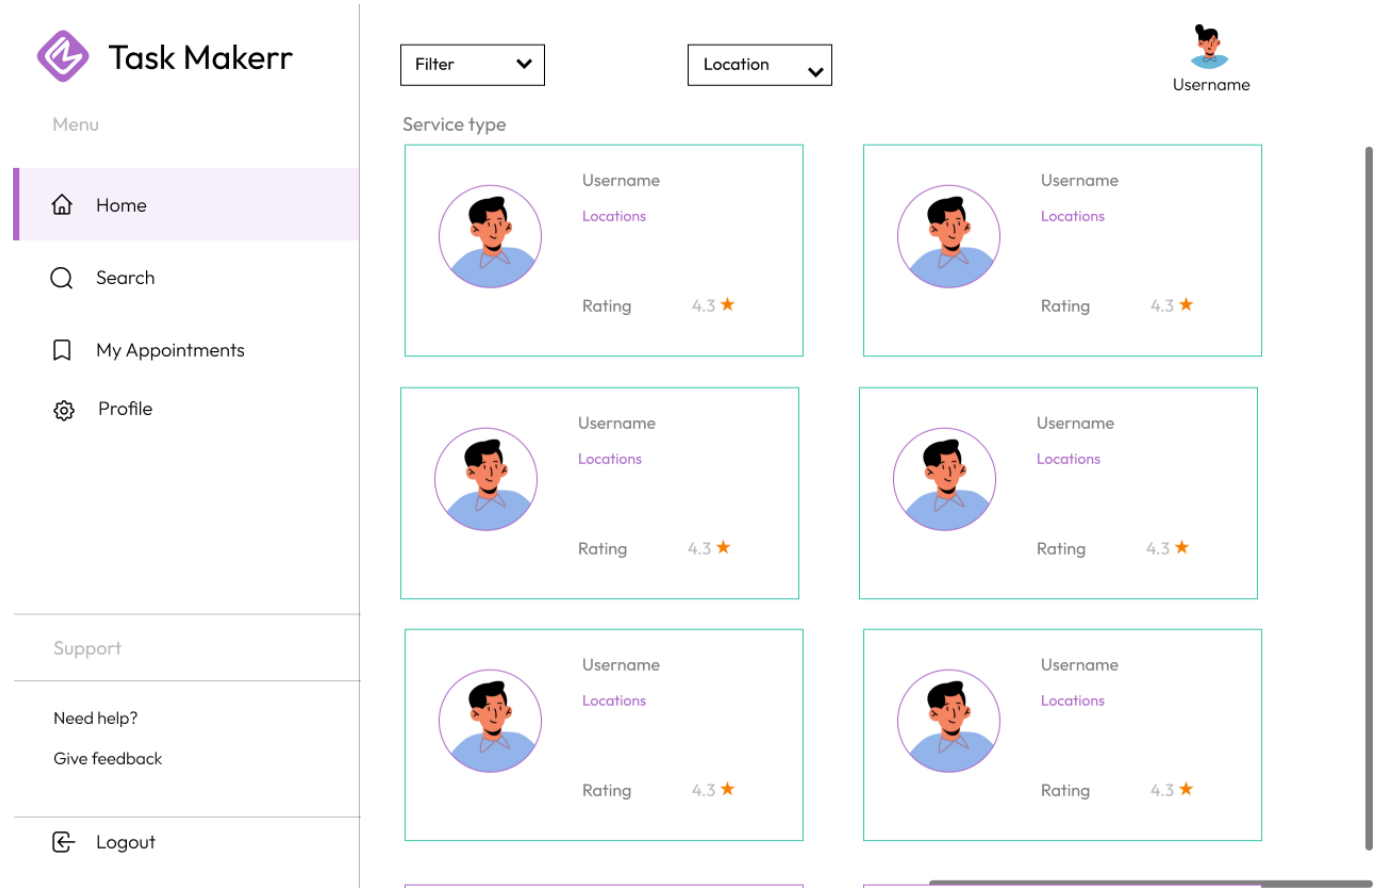

This form is responsible for displaying a list of providers based on certain criteria, such as service type, rating, and location. It interacts with a database to retrieve provider data and presents this information in a scrollable panel of "viewMore" tiles, which allow users to click and view more details about each provider.

Access Scope

Any customer who has an account can access this page.

Usage Instructions

- Click on the provider tile to navigate to the page to book slots.

User Search

This form is responsible for searching for providers based on certain criteria, such as service type, rating, and location. It interacts with a database to retrieve provider data and presents this information in a scrollable panel of "provider" tiles, which allow users to click and view more details about each provider.

Access Scope

Any customer who has an account can access this page.

Usage Instructions

- Click on the search bar to enter a search query.
- Select the search criteria from the dropdown menu.
- Click on the search button to search for providers based on the search query.
